

Digital Adapter

PS-2159

Introduction

The PS-2159 Digital Adapter allows a digital ScienceWorkshop sensor to be used with a PASPORT interface. Multiple Digital Adapters can be used simultaneously to support multiple ScienceWorkshop sensors.

Compatible PASPORT Interfaces	Part Number
Xplorer GLX	PS-2002
Xplorer	PS-2000
Power Link	PS-2001
USB Link	PS-2100

Equipment and Software Setup

DataStudio version 1.9.5 (or later) is required. Visit www.pasco.com to download the latest version of DataStudio.

Single-connector Digital Sensors

Follow these steps to connect one or two photogates, Smart Pulleys, nuclear sensors, and other switch- or counting-type sensors that have a single ¹/₄-inch stereo phone plug.

The first three steps can be performed in any order.

- **1.** Connect one or two digital ScienceWorkshop sensors to the Digital Adapter.
- 2. Connect the Digital Adapter to a PASPORT interface
- **3.** Connected the PASPORT interface to a computer.

- **4.** If DataStudio is not running, it will launch automatically.
- **5.** The PASPORT timers list will open automatically. Select the desired timer from the list and click OK.
- **6.** To view and change the constants, visible measurements, and other settings of the selected timer, press the Setup button in DataStudio's main tool bar; the Experiment Setup window will open. Refer to DataStudio documentation for further instructions.

For information on selecting and configuring a PASPORT timer, open the Help menu and search for "Timing Sequences."

Double-connector Digital Sensors

Follow these steps to connect a ScienceWorkshop Motion Sensor (CI-6742) or Rotary Motion Sensor (CI-6538).

The first three steps can be performed in any order.

- Connect the yellow plug of the sensor to port 1 of the Digital Adapter. Connect the black plug of the sensor to port 2 of the Digital Adapter.
- **2.** Connect the Digital Adapter to a PASPORT interface.
- **3.** Connected the PASPORT interface to a computer.
- **4.** If DataStudio is not running, it will launch automatically.
- **5.** The PASPORT timers list will open automatically. Select Motion Sensor or Rotary Motion Sensor from the list and click OK.
